

Deep & Ultra-deepwater Market Update Report To 2014

The sixth edition of this Global Perspectives Report, published by Infield, provides a comprehensive and independent analysis and forecast of issues and trends impacting the development of the global deepwater and ultra-deepwater oil and gas market. The report is essential reading as it assesses the major sectors for this important market.

The Deepwater Arena:

The year 2009 was a tough one for the global energy industry given the impact of the global economic crisis on oil demand, with oil prices collapsing from \$147 per barrel (p/b) in mid-2008 to \$34 p/b by early 2009. The offshore oil and gas market did not escape unscathed and investment – as elsewhere in the global energy scene – stalled.

However, the longer term trends for deep and ultra-deepwater remain promising, the difficulties of 2009 notwithstanding. As oil demand recovers and onshore hydrocarbon basins continue to mature, efforts to explore and develop deep and ultra-deepwater plays will intensify across the globe.

As a result Infield sees upward potential for all market sectors associated with the deep and ultra-deepwater industry throughout this report's forecast period and not just in the Americas and West Africa regions that have been traditionally dominant in global deepwater investment and production. This report highlights growth in operator investment in deepwater plays in Europe, Asia, Australia and even the Middle East as well.

The report also assesses the major players in the deep and ultra-deepwater market, and analyses which of the market sectors will attract the most Capex between 2010 and 2014. In particular, Petrobras will remain the key global deepwater oil and gas player, while total Capex will mainly be directed towards pipelines and subsea infrastructure. Meanwhile global platform Capex in water depths greater than 1,000 metres is forecast to rise rapidly, which reflects the fact that efforts to extract hydrocarbons further offshore will grow more intense.

Finally, the report provides a brief assessment of the latest offshore oil and gas frontiers – including Brazil's pre-salt reserves, the Gulf of Mexico's Lower Tertiary trend, and offshore natural gas reserves located off the coast of north-west Western Australia. It also looks at potential "game changers" for the offshore oil and gas market, such as Iraq's potential as a major oil producer and the development of unconventional gas in the US and Australia.

Given the context of a rapidly changing and unsettled business environment that the deep and ultra-deepwater market faces, it has become more vital than ever before for operators to access reliable sources of information on this sector. Simply relying on the extrapolation of historic trends will no longer be enough. With all our forecasts built from the bottom upwards - and including accurate up to date project information underpinning every market sector – this sixth edition of the **Deep and Ultra-deep Market Update To 2014** maintains Infield Systems' position as the leading supplier of offshore forecasting, analysis and commentary to operators, contractors, manufacturers and financial institutions alike.

Who is buying Infield Publications?

Buyers of Infield's reports range from fully integrated oil companies, national oil companies, contractors, service and supply companies, manufacturers and consultants. The reports are used by senior management, market and financial analysts and consultants.

Why you should buy this report:

- Infield's modelling process, OFFPEX, is based upon a unique "bottom up approach". The component by component, project by project process is robust and has a proven track record
- Timely and accurate analysis on the impact of global economic trends on the offshore oil and gas sector
- Independent and up-to-the minute analysis of the rapidly changing and dynamic deep and ultra-deepwater sector
- Five year forecast for strategic decision making
- Compare and contrast the current forecast with the previous edition to gain a greater understanding of Infield's modelling process and to identify market drivers and dynamics
- Appraise on a regional, country by country, and sectoral basis the capital expenditure and project numbers for each sector of the deep and ultra-deepwater market, including; platforms, subsea, pipelines and control lines

Report Contents

- **Executive Summary** provides a comprehensive executive overview of the complete market sector
- **Global Market Context** reviews the drivers behind the deepwater business including such issues as the current credit market turmoil, oil price level and its effect on activity, primary energy consumption, analysis of proved oil and gas reserves and oil and gas production, offshore versus onshore market overview and the major supply constraints facing the industry
- **Global Deepwater Business Overview** is a new section designed to provide a clear understanding of the key operators and contractors in the deepwater arena with a particular focus on the subsea tree, leased FPSO and specialist vessel market
- **Regional Analysis & Forecasts** for each region (Africa, Asia, Australasia, Europe, Latin America, Middle East & Caspian and North America) analysis is provided by country and sector for platforms, subsea, pipelines and control line
- **Sector Analysis & Forecasts** Detailed forecasts are provided by the four market sectors; platforms, subsea, pipelines and control lines
- **Global Forecasts Comparison** provides a comparative analysis of the 2009 edition global forecasts with the previous edition to provide a greater understanding of the modelling system and the dynamics of the deepwater business
- **Regional & Sector Maps** provides the reader with a unique visual overview of all deepwater regions, reserves, production, platforms and pipelines

GLOBAL PERSPECTIVES

Deep & Ultra-deepwater Market Update 2009/13

1 EXECUTIVE SUMMARY

Recent years have seen the growth and consolidation of the global deepwater offshore industry. It is forecast that the next period of offshore activity will be defined by the impact of the global economic crisis and the impact of the global economic crisis on the offshore oil and gas market. The report provides a comprehensive analysis of the offshore oil and gas market, including a five year forecast for strategic decision making.

Year	2009	2010	2011	2012	2013	2014
Production (m bbl/d)	10.5	10.8	11.2	11.6	12.0	12.4
Reserves (billion bbl)	100	105	110	115	120	125
Investment (\$ billion)	150	160	170	180	190	200

2 GLOBAL MARKET CONTEXT

The global market context is defined by the impact of the global economic crisis on the offshore oil and gas market. The report provides a comprehensive analysis of the offshore oil and gas market, including a five year forecast for strategic decision making.

3 REGIONAL ANALYSIS & FORECASTS

Regional analysis is provided by country and sector for platforms, subsea, pipelines and control line.

Region	2009	2010	2011	2012	2013	2014
Africa	10	12	14	16	18	20
Asia	8	10	12	14	16	18
Australasia	6	8	10	12	14	16
Europe	4	6	8	10	12	14
Latin America	2	4	6	8	10	12
Middle East & Caspian	1	2	3	4	5	6
North America	1	2	3	4	5	6

4 REGIONAL & SECTOR MAPS

Regional & Sector Maps provides the reader with a unique visual overview of all deepwater regions, reserves, production, platforms and pipelines.

Searchable Online Projects Database

Purchasers of the Global Perspectives Deep and Ultra-deepwater Market Update will receive 12 months' free access to an online database of fields in water depths of 500 metres and greater being planned or considered for development from 2010 through to 2014, worldwide, via InfieldLive. Details about each project include:

- Field Operator
- Project Name
- Development Type
- Year On Stream
- Date Discovered
- Depletion Date
- Reserves
- Field Production Rates
- Location
- Development Type
- Water Depths
- Project Status
- Numbers of Subsea Wells
- High Temperature / High Pressure

Subscriptions can be upgraded to include other deepwater and shallow water fields or other data sets from the Infield Offshore Energy Database. InfieldLive provides access to the previous day's updates.

The Infield Energy Analysts

Infield is an independent energy research and analysis firm that is dedicated to the provision of accurate and up-to-date data, market sector reports, mapping, analysis and forecasts to the offshore oil and gas and associated marine industries. Infield services clients in over 40 countries from a wide range of organisations including E&P companies, contractors, manufacturers, government agencies and the financial community. Infield is widely acknowledged as the definitive independent information resource and has been involved in market due diligence concerning mergers, acquisitions and transactions in the energy industry.

Offshore Energy Database (OED)

The OED provides detailed and up to date information about all worldwide offshore oil and gas fields. The earliest listed project is Bibi Eibat which came on stream in 1923 in Azerbaijan. The furthest ahead are decommissioning projects not expected to proceed for several decades.

Infield comprises 8,750 offshore fields in 127 countries, involving over 950 operators and more than 1,550 participant companies. Infield is updated daily so clients can expect to be kept informed about new projects as and when they happen.

Global & Regional Perspectives Reports:

Infield publishes a wide range of publications on the offshore oil and gas and associated marine industries, covering sectors and regions;

- Deep & Ultra-deepwater Market Update
- Pipelines & Control Lines Market Update
- Fixed Platforms Market Update
- Subsea Market Update
- Floating Production Market Update
- Specialist Vessels Market Update
- FPSO Market Update
- Accommodation Market Update
- Heavy Lift Market Update
- Heavy Transport Market Update

Regional Perspectives Reports:

- Asia Pacific Market Update
- Africa Market Update
- Europe Pacific Market Update
- Latin America Market Update
- Middle East Market Update
- North America Market Update

For availability and publication dates, please see InfieldLive.Com for further details.

Order Form

To secure your copy of The Global Perspectives Deep & Ultra-deepwater Market Update 2010/14, please complete the order form below or buy online at www.infieldlive.com. Infield Systems Limited accepts payment by bank transfer, credit card (Visa, MasterCard or American Express) or by cheque. Delivery is upon receipt of payment. For credit card purchases please supply the billing address.

Multiple copy discount and corporate wide licences are available; please contact a member of the Infield Team for details.

By purchasing this document, your organisation agrees that it will not copy or allow to be copied in part or whole or otherwise circulated in any form any of the contents without prior written and specific permission from Infield Systems Limited. Our standard terms and conditions are available either upon request or at www.infieldlive.com.

Please supply the Deep & Ultra-deepwater Market Update Report 2010/14 to my organisation for £2,200.00, excluding delivery (Printed Report delivery to the UK is £20.00, delivery outside UK is £70.00 by DHL). I have read and fully understand the terms and conditions of sale located at www.infieldlive.com.

CONTENTS LIST

1. EXECUTIVE SUMMARY	35
2. MACRO OVERVIEW	43
2.1 OCTOBER 2008 TO 2010	43
2.1.1 <i>Oil Price Changes & Sanction Price</i>	43
2.1.2 <i>Financial Impact</i>	45
2.1.3 <i>Supply Chain Impact</i>	45
2.2 HOW ARE THE FOLLOWING SECTORS REACTING?	46
2.2.1 <i>Oil Companies</i>	46
2.2.2 <i>Oil Services</i>	47
2.3 ENERGY OUTLOOK	48
2.3.1 <i>Supply and Demand</i>	48
2.4 OFFSHORE TRENDS	49
2.4.1 <i>Oil Production & Reserves</i>	49
2.4.2 <i>Gas Production & Reserves</i>	50
2.4.3 <i>The Move to Deeper Waters</i>	51
2.5 OFFSHORE FRONTIERS	52
2.5.1 <i>Brazil, Pre-Salt</i>	52
2.5.2 <i>Gulf of Mexico, Lower Tertiary</i>	52
2.5.3 <i>Western Australia, Stranded Gas</i>	53
2.6 GAME CHANGERS.....	53
2.6.1 <i>Iraq</i>	53
2.6.2 <i>Unconventional Gas</i>	54
3. GLOBAL DEEPWATER BUSINESS OVERVIEW	57
3.1 DEMAND OVERVIEW.....	57
3.1.1 <i>Petrobras</i>	60
3.1.2 <i>ExxonMobil</i>	63
3.1.3 <i>Total</i>	67
3.1.4 <i>BP</i>	70
3.1.5 <i>Chevron</i>	72
3.1.6 <i>Shell</i>	76
3.2 SUPPLY OVERVIEW.....	79
3.2.1 <i>Supply of FPSOs</i>	79
3.2.2 <i>Supply of Subsea Trees</i>	81
3.2.3 <i>Installation Vessel Availability</i>	86
4. REGIONAL ANALYSIS & FORECASTS	89
4.1 OVERVIEW	89
4.2 AFRICA	90
4.2.1 <i>Overview</i>	90

4.2.2	Prospectivity Analysis.....	92
4.2.3	Operators	96
4.2.4	Platforms	98

Using Infield PDF Publications With The FileOpen System

Infield Systems Limited makes available their Global & Regional Perspective publications in PDF format through the FileOpen System for sharing electronic files. The FileOpen System registers your computer on their sever and every time you open a shared PDF it “pings” the server to check for permission rights to the file that is being opened. If you are permitted to open the file then it will open as normal.

The system is straight forward to use, however, it is important that you make sure you can download the File Open Plugin before you request a report in PDF.

Adobe Versions:

File Open will work with versions of Adobe Acrobat and Adobe Professional 7 and beyond. if you are using Adobe Acrobat 7 and Adobe Professional 7 you will have problems printing the reports, so if you can we recommend to the latest version available, which can be downloaded from <http://www.adobe.com>.

Downloading Your Report:

1. You can download your report from <http://www.infieldlive.com/infieldlive>. Save the report to your local hard disk.
Do not try and open it yet!

Registration of Your Computer:

2. You need to download the FileOpen Plugin which is a JAPPLET file. This is a Java Applet component of a software application. You can download it from <http://plugin.fileopen.com/>

You will need administrator rights to your computer, so you may need your system administrator to install the plugin for you if you do not have administrator rights. If you system administrator will not install the plugin then please contact the Infield Team for advice.

3. One you have installed the FileOpen Plugin you must complete the registration process by clicking on the PDF that was attached to your registration email. You must be online. You will then see a PDF document saying that the computer has been successfully registered.
4. Open up Adobe Acrobat or Adobe Reader and go File > Open > open the report. If you get an error message saying that your computer is not registered to open the document, retry steps 2 and 3 above. If that does not work please contact the Infield Team.
5. Once you have opened the report, you can open it as many times as you wish on the registered computer. If you are travelling and are offline you have a period of 5 days you can use the report before you have to open the report online again to “ping” the FileOpen Server which refreshes the document registration.

Printing The Report:

6. You can print the reports and depending upon the licence you have purchased you have a limited number of print runs. The default licence is a single print. Infield reports are usually landscape can be printed double sided (duplex printing) which is “flipped” so when the report is bound you can see both pages together. If you do not have duplex printing capability then you can print the report single sided.
7. The first time you open the report you sometimes cannot see the print menu. This is because the file has not “pinged” the FileOpen Server correctly. The simple solution is to close the report, close and reopen Adobe and then open the file again. The print menu should be available now, if it is not then please contact the Infield Team.

Changing Computers & Registered Users:

8. If you change computers or wish to change the registered user for the report then please contact the Infield Team to issue a new registration and cancel the old one.
